

18 REASONS
to **PURCHASE** an

eSpring
**Water
Filtration
System**

18 Reasons to Purchase an eSpring Water Filtration System

1. Cleaner, clearer, better tasting water right from your tap
2. Better quality water
3. Independently verified and certified by the NSF International - a global, independent organization that sets standards for product safety and tests and certifies products for compliance
4. Cutting edge technology
5. Backed by over 25 years of research, patented technology and sold in at least 40 countries/territories
6. Simple installation and ease of use
7. Easy maintenance and single cartridge replacement
8. Superb quality, value, and environmentally preferred

9. Reduces over 160 potential health-related contaminants. No system reduces more.

10. The first in-home system to be certified to meet these 6 separate international standards of water quality by NSF International, 42, 53, 55B, 401, P473 & P477.

1. Standard 42: Improves taste, odour, and clarity.

2. Standard 53: Reduces health-effect contaminants.

3. Standard 55B: Reduces microorganisms with UV light.

4. Standard 401: This includes pharmaceuticals, over-the-counter medications, herbicides, and pesticides.

5. P477: These point-of-use filters reduce microcystin (toxins produced by blue-green algae) below the health advisory set by the EPA. NSF

6. P473: PFOA/PFOS water filters or systems are evaluated on their ability to reduce PFOA and PFOS in drinking water and to meet strict material safety and structural requirements as defined in NSF/ANSI 53.

11. Has earned the Water Quality Association's Gold Seal for superior consumer water treatment products.

12. Works well at all household water pressures, from very low to very high.

13. The cartridge is designed to serve the average cooking and drinking water needs for a family of 6 for one year or 5,000 litres, whichever comes first.

14. Cost-effective: The cost per litre in the second year and beyond is 6 cents.

15. Patented monitoring system lets you know the carbon filter and UV bulb are working, and when it's time for the annual cartridge change.

16. Changing the cartridge requires no special tools and is as simple as changing a light bulb.

17. The UV bulb inside the cartridge switches on only when you turn on the tap, so water flows cold, not warmed by the UV light.

18. Comes with a two-year limited warranty on parts and labour. And a refund within 120 days of your purchase if you're not completely and utterly satisfied.

The eSpring® Water Purifier is the world's largest selling brand of kitchen water treatment systems.*

In addition to dramatic improvement in taste, odor, and clarity, eSpring reduces more than 160 potential health-effect contaminants in drinking water and uses UV light to treat water additionally without the use of chemicals.

*Based on Verify Markets study of 2013 sales.
